

Colombia Mining Mission 4 - 8 October 2010

This Austrade, Trade and Investment Queensland and Austmine joint mission is designed to identify and target opportunities for Australian companies in mining in Colombia. Colombian mining is on the rise thanks to its mineral potential and a pro-mining government that has been very active in promoting the industry over the last decade.

This mission will provide a unique opportunity for companies servicing the mining industry to exhibit at the international mining event *Colombia Minera* in Medellin and also visit key mining operations in the state of Antioquia.

In its 6th year *Colombia Minera* is expected to attract over 500 exhibitors from Colombia and the Latin American region. A mining congress is also held as part of Club Minera which will further provide access to key-decision makers from the major mining groups and contact with distributors and agents.

This event will provide Australian exporters of mining technologies and services interested in opportunities in Colombia with an excellent platform to showcase their products and services.

In attracting world-class mining innovation to Colombia, Austrade, Trade Queensland and Austmine in collaboration with the Government of the state of Antioquia invite Australian companies to exhibit *free-of-charge* at the Australian pavilion during *Colombia Minera*. This offer consists of individual booth space per company including equipment, signage and directory listing.

The registration fee covers all costs also associated with the mine site visits and in-market event coordination and management provided by ANDI Asomineros.

We invite interested companies to join this mission to Colombia and explore first-hand the market's export and investment opportunities in the growing mining sector.

The number of stands is limited and one stand at 9m² will be allocated per company. Registration including payment will be recorded on a first-come, first-served basis finishing on **Friday 20 August**. *Don't miss out..!*

Important Information

Dates

4 - 8 October 2010
