Colin Chandler -  
CEO Peak 3

DPM  
"The Myths  
and Reality"

Colin Chandler is the CEO of Peak3 Pty Ltd. Over the last 20 years, he has developed world leading technology companies. He has a Masters from Griffith Uni and is about to embark on his PhD in Emissions Reduction Strategies in Mining.

Dr Patrick Glynn - CSIRO

"Current Treatment  
and Monitoring in  
Mines."

Dip. in Electrical Eng, MA in Technology Mgmt and a PhD. in radar physics. He has 35 yrs working in R&D, with Philips Electrical in thermodynamics & stored energy systems, Griffith Uni in Technology Mgmt & CSIRO in mine health, safety & environment projects. Patrick has in depth knowledge of diesel particulate emissions in mining.

Dominic Posavec

"The Vehicle as  
a Solution"

Dominic has 32 years experience working in the mining industry sector. This included from hands on underground work being a fitter to Manager of Mechanical Engineering. He is currently **NSW General Manager of Design & Development for DMS Underground Division**. Dominic has a degree in OH&S.

Dr Richard Brown  
Assoc. Prof QUT

"Diesel Engine  
Efficiency and  
Emissions as  
Mech Markers"

An Associate professor in the Faculty of Sciences and Engineering at the Queensland University of Technology. Dr Brown established the Biofuel Engine Research Facility at (QUT), and with his research team ran and provided the Qld component of the ALA Fellowship program in advanced biofuels training.

Ray Morgan - Peak3

"Monitoring"

BSc. GradDip InfoSys. Leads Peak3's project on valid emission monitoring & automation. He is currently Partner Investigator for the Australian Research Councils Linkage project with QUT which optimizes gaseous and particulate emission from diesel engines.

Dr Zoran Ristovski  
Assoc. Prof QUT  
International Laboratory  
of Air Quality and Health

"The Health  
Aspects of DPM"

BE Electrical Engineering, MSc Engineering Physics, PhD Engineering Physics. Zoran has published 49 journal publications in the last 5 years and 91 in total. Covering Environmental Science & Engineering with half directly in the area of Emissions from Internal Combustion Engines.

Neil Davey - Peak3

"Treatment and  
Monitoring  
Automation"

Director of R&D for Peak3, with a Bachelor of Engineering in Microelectronics (Hons.) and a Masters of Philosophy in the use of accelerometers for monitoring of athlete performance from Griffith Uni. Neil has a strong background in R&D and product development, and productisation of prototype technologies.

Emissions cost you a lot of money.  
Emissions can save you a lot of money.  
Plan to automate.  
It's the data that counts!

# Practical Guide to DPM Management

Make sure  
you're not creating emissions,  
but measuring emissions.
